SUMMARY

Senior Software Engineer with 8+ years of experience building web applications, backend services, and data-intensive systems. Experienced in TypeScript, Go, Python, and JavaScript, with strong frontend expertise in Angular and React and experience developing high-capacity backend services. Comfortable working with relational and graph databases, cloud platforms, CI/CD pipelines, and modern software development practices. Experienced in collaborating with distributed, cross-functional teams to design, develop, and deliver production software.

TECHNICAL SKILLS

TypeScript, Go, Python, Angular, React, Responsive UI Development, Backend Services, PostgreSQL, Cloud SQL, Neo4j, Google Cloud Platform, Git, GitHub, GitLab, CI/CD, Jira, Confluence, Agile/Scrum, Technical Documentation

EDUCATION

MSc. Computer Science
University of Nairobi
2025 – Ongoing

EXPERIENCE

Senior Frontend Developer at Sportserve (Apr 2024 – Present)

- Collaborate within a globally distributed engineering team to design, develop, test, and maintain production systems.
- Develop responsive frontend applications using TypeScript and Angular, with backend services and data processing using Go.
- Work with large and diverse datasets to present actionable insights through performant, user-focused interfaces.
- Contribute to technical documentation and engineering practices that support maintainable and consistent application development.

Frontend Developer at Circl Solutions (Aug 2022 – Jan 2024)

- Developed core features for a high-traffic logistics and e-commerce SaaS platform using TypeScript and Angular.
- Collaborated with engineers and stakeholders across a globally distributed team throughout the software development lifecycle.
- Authored technical onboarding documentation and user guides to support engineering teams and application users.

Lead Frontend Developer at Proto Energy (Nov 2020 – Jul 2022)

- Led frontend development for internal logistics applications and a customer-facing e-commerce marketplace
- Collaborated with cross-functional stakeholders to translate business requirements into reliable and user-friendly software.

Software Developer at Novek Technologies (Oct 2019 – Oct 2020)

- Owned the UI design and development of a real-time IoT telemetry dashboard for vending machine monitoring.
- Visualized complex data streams to provide actionable operational insights for field technicians.

Associate Software Engineer at Andela (Nov 2018 – Oct 2019)

- Developed and shipped features for a financial coaching dashboard while under apprenticeship with international engineering leads.
